

Simplify your Cover-Pools system and upgrade your pool cover's performance.

Add power and automation with the **NEW Save-T® 3 "big RED" motor and mechanism** or **NEW CoverLink™ wireless control**, exclusively from **Cover-Pools**.

Save-T® 3 | big RED motor and mechanism

Powerful Motor

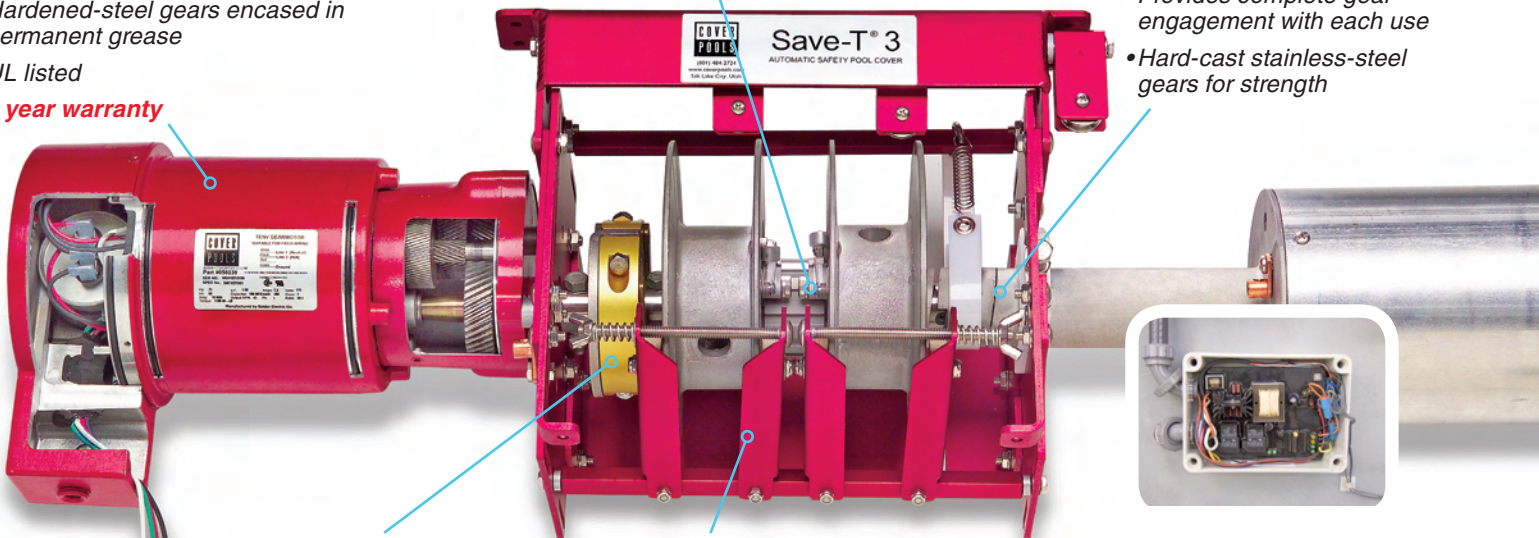

- **Exclusive** 3/4 hp waterproof submersible motor
- More available torque than other electric or hydraulic motors on the pool cover market
- O-ring sealed with potted wire entry points
- Hardened-steel gears encased in permanent grease
- UL listed
- **3 year warranty**

Rope Reel System

- **Exclusive** EZ-Lock rope reel system for simple cover alignment

Positive Shift System

- **Exclusive** positive-shift system
- 3/8" solid stainless-steel drive dowel
- Provides complete gear engagement with each use
- Hard-cast stainless-steel gears for strength

Slip Clutch

- Acts as torque-limiting safety device to protect cover and mechanism
- **Exclusive** design with industrial marine-grade brake material (eliminating plastic parts)
- Designed to last a lifetime
- Electric system comes with either a slip clutch or auto shut-off

Mechanism

- Marine-grade anodized aluminum brackets
- All stainless-steel hardware
- All aluminum components, castings and extrusions are anodized

Auto Shut-Off with Amp Limiter

- Shuts motor off when cover is fully opened or closed
- Amp limiter acts like an electronic slip clutch
- LED diagnostic indicators
- Works with accessory board to control water features
- Electric system comes with either a slip clutch or auto shut-off

CoverLink™ wireless control system

NO MORE—cover controls located in the pit!
NO MORE—inconvenient or unsecure control switches!

Get convenience at the touch of a button when you upgrade to a **CoverLink™ wireless control**. The code-accessed wireless control system allows endless options for mounting the touch pad within view of the pool and can be retrofitted to existing cover systems. Program up to four digital codes to create convenient and secure access to the system. (The Cover-Link™ wireless control uses the electronic auto shut-off instead of the slip clutch.)
